Description of Work: START 4 is hereby directed to respond to a threat to Waters of the United States on the Navajo Nation due to an acid mine drainage release from the Gold King Mine near Durango, Colorado. The affected water body is the San Juan River in the vicinity of Farmington, NM. START 4 shall support the FOSC as directed which may include but not inclusive of the following:

- 1- Provide at least six field persons to conduct surface water sampling, sediment sampling, and provide technical assistance to the US EPA and Navajo EPA.
- 2- Provide database and mapping support for all screening and sampling activities.
- 3- Provide screening and laboratory analytical for multiple environmental media, including surface water and sediments.
- 4- Provide data validation for all laboratory analyses performed under this TDD.

Assumptions: Two weeks for six STARTs, followed by two additional weeks of two STARTs on site to conduct follow-up sampling.

See attached CPW for further details.

All tasking cost under this TDD will be monitored and tracked under RCMS.
